

## TABLE OF CONTENTS (Abbreviated)

Book content hierarchy, listed here in order of descending importance, is -

**Table, Note or Part :** Chapter (or chapter equivalent) : *Topic* : minor topic

Part	Chapter	Topic	<u>minor topic</u>	Page Number
<b>Cover:</b>				
<b>Table of Contents:</b>				TOC:1.1 - 1.6
<b>Notes:</b> Ownership and Copying.				NTE:1.1 - 1.2
Acknowledgments				NTE:2.1 - 2.2
Author's Notes to the Reader.				NTE:3.1 - 3.6
<b>Part 1: The Adventure, its Phases and Events</b>				
Prolog				1:PLG.1 - PLG.7
<i>Lexicon of Ancient Amateur Antique Technical Terminology</i>				1:PLG.4 - PLG.6
<i>Index of 30 Published QST Articles, Feedback/Tech Correspondence</i>				1:PLG.7
Ch 1 The men, the moment, and the machine.				1:1.1 - 1.38
<i>The men who made it possible</i>				1:1.1 - 1.10
<i>The moment in time</i>				1:1.10 - 1.13
<i>The machine</i>				1:1.13 - 1.15
<i>Supplemental information</i>				1.1.15
<i>Chapter 1 references:</i>				1:1.16 - 1.38
Ch 2 Design architecture, specifications and expectations				1:2.1 - 2.46
<i>Architecture</i>				1:2.2 - 2.7
<i>Specifications</i>				1:2.7 - 2.10
<i>Reality and Expectations</i>				1:2.10 - 2.13
<i>A warning to readers of chapters following</i>				1:2.13
<i>Chapter 2 references:</i>				1:2.14 + 28 pgs
Ch 3 Overview & Comparison of HBR Models				1:3.1 - 3.35
<i>The operational headroom issue</i>				1:3.1 - 3.2
<i>HBR thumbnail descriptions, schematics &amp; parts lists</i>				1:3.3 - 3.34
<i>Ted's major goal in developing his HBR design (1957 - 1969)</i>				1:3.34 - 3.35
Ch 4 Circuit details				1:4.1 - 4.67
<i>Front-end regeneration</i>				1:4.1 - 4..19
<i>Overall receiver stability</i>				1:4.20 - 4.21
<i>Oscillators</i>				1:4.21 - 4.32
<i>1st Detector/Mixer</i>				1:4.32 - 4.43
<i>IF amplification</i>				1:4.43 - 4.45
<i>2nd Oscillator and Mixer Circuits</i>				1:4.45 - 4.46
<i>2nd IF amplifier Circuits</i>				1:4.46 - 4.47
<i>HBR-XX broad/sharp selectable 2nd IF &amp; tunable filter</i>				1:4.48 - 4.54
<i>Audio detectors</i>				1:4.54 - 4.57
<i>Automatic gain control (AGC) and S-meter control circuitry</i>				1:4.57 - 4.61

Part	Chapter	Topic	minor topic	Page Number
		<i>Audio amplifiers and slot filter (Selectoroid)</i>		1:4.61 - 4.62
		<i>Power supply issues</i>		1:4.62 - 4.63
		<i>Things not to do</i>		1:4.63 - 4.67
	Ch 5	Coils		1:5.1 - 5.72
		<i>Physical Aspects of the Coils</i>		1:5.3 - 5.4
		<i>Coil components</i>		1:5.4 - 5.6
		<i>Constructing the coil "innards"</i>		1:5.6 - 5.8
		<i>Winding the coils</i>		1:5.8 - 5.10
		<i>W6TC coil specifications</i>		1:5.10 - 5.18
		<i>L3 tickler coil &amp; Harley 1st oscillator</i>		1:5.18 - 5.24
		<i>Ted's Advice on Bandsread Setting</i>		1:5.24 - 5.26
		<i>The tuning capacitor/coil puzzlement</i>		1:5.26 - 5.27
		<i>The quandary of present-day coil form substitutes</i>		1:5.27 - 5.29
		<i>The perfect hindsight view &amp; the Wizards Wise Words</i>		1:5.29 - 5.31
		<i>Chapter references:</i>		1:5.32 - 5.72
	Ch 6	Stability -		1:6.1 - 6.22 + 27 pgs
		<i>Electric power instability</i>		1:6.1 - 6.2
		<i>Mechanical instability</i>		1:6.2 - 6.6
		<i>Circuit instability</i>		1:6.6 - 6.7
		<i>Thermal instability and how to improve it</i>		1:6.8 - 6.10
		<i>Some ventilation guidelines</i>		1:6.10 - 6.11
		<i>Convection vs. mechanical ventilation</i>		1:6.11
		<i>Negative Temperature Compensation</i>		1:6.11 - 6.16
		<i>Contemporary analysis of test data</i>		1:6.16 - 6.17
		<i>Sample test records</i>		1:6.17 - 6.19
		<i>Chapter references:</i>		1:6.20 - 16.22 +16 pgs
	Ch 7	Alignment and test points		1:7.1 - 7.12
		<i>Alignment instructions for plug-in coils</i>		1:7.1 - 7.4
		<i>I.F. alignment</i>		1:7.4 - 7.5
		<i>Tubes</i>		1:7.5
		<i>Test points and voltage/current measurements</i>		1:7.5 - 7.11
		<i>Some conclusions</i>		1:7.12
	Ch 8	Operating guidelines for an HBR		1:8.1 - 8.13 + 2 pgs QST
		<i>The "too busy" HBR front panel</i>		1:8.1 - 8.2
		<i>Antenna trimmer &amp; outboard attenuators</i>		1:8.3 - 8.4
		<i>RF gain, mixer gain, I.F. gain, Audio gain</i>		1:8.4 - 1.85
		<i>Main tuning control</i>		1:8.5
		<i>AGC ON/OFF switch &amp; detector switch SSB/AM-CW</i>		1:8.5 - 8.6
		<i>T-notch rejection filter</i>		1:8.6
		<i>Dual 2nd IF broad/sharp selector switch</i>		1:8.6 - 8.7
		<i>W0SX audio slot filter OFF/wide/narrow</i>		1:8.7
		<i>Calibration oscillators 3.5 MHz and 100 kHz</i>		1:8.7
		<i>BFO ON/OFF, BFO Tuning, TRANSMIT/RECEIVE and MUTE switches</i>		1:8.8
		<i>Developing your personal operating procedure</i>		1:8.8 - 8.9
		<i>Receiver design/maintenance issues affecting operation</i>		1:8.9

Part	Chapter Topic <u>minor topic</u>	Page Number
	<i>Operational guidelines from other sources</i>	1:8.9 - 8.11
	<i>Some operational reflections</i>	1:8.11 - 8.12
	<i>Chapter references</i>	1:8.13 + 2 pgs
Ch 9	The HBR Adventure's Three Phases	1:9.1 - 9.11
	<i>The Development Phase 1957 - 1970</i>	1:9.1 - 9.3
	<i>The Repose Phase 1970 - 2000</i>	1:9.3 - 9.4
	<i>The Revival Phase 2000 - present (and beyond)</i>	1:9.4 - 9.5
	<i>The driving forces, then and now</i>	1:9.5 - 9.6
	<i>A last look at the two principal characters, Ted and Alex</i>	1:9.6 - 9.9
	<i>Things I would do differently</i>	1:9.10 - 9.11
	<i>What the future may hold</i>	1:9.11
Epilog		1:EPL.1 - EPL.16
	<i>The men who made it happen</i>	1:EPL.1 - EPL.5
	<i>Ted's inner circle</i>	1:EPL.5
	<i>The builders - TD&amp;H</i>	1:EPL.5 - EPL.13
	<i>The HBR designs in the 21st Century</i>	1:EPL.13 - EPL.15
	<i>Afterwards</i>	1:EPL.15 - EPL.16
<b>Part 2 - HBR References</b>		2:0.1 - 0.2
Ch 1.	HBR Builders Notes	2:1.1
	<i>HBR14 chassis and wiring photographs</i>	2:1.1 plus 2 pgs
	<i>W8MUZ Builder's Notes for the HBR14 and HBR16</i>	2:1.2 plus 37 pgs
	<i>K4FX Builder's Notes for the HBR11 and HBR13C</i>	2:1.3 plus 8 pgs
	<i>K4FX Strays - Corrections to the Builders Notes</i>	2:1.4 plus 2 pgs
	<i>K4FX Strays Nr 1 through 3</i>	2:1.5 plus 4 pgs
	<i>Some additional "loose ends" W6TC</i>	2:1.6 plus 4 pgs
	<i>Ted's form letter to initial HBR inquiries</i>	2:1.7 plus 2 pgs
Ch 2	HBR-XX W6HHT Notes	2:2.1
	<i>Block Diagram &amp; Schematics</i>	2:2.1 + 13 pgs
	<i>Photographs</i>	2:2.2 - 2.7
Ch 3	Eddystone Dial Drives - VE7GUH	2:3.1
	<i>Eddystone User Group Technical Shorts</i>	24 pgs
	<i>Eddystone Dial Drive on HBR 13C</i>	14 pgs
	<i>Eddystone 898 catalog data</i>	3 pgs
Ch 4	Personal HBR Notes	2:4.1
<b>Part 3 - General References</b>		3:0.1 - 0.2
Ch 1	ARRL Radio Handbook Extracts	3:1.1 - 1.3 +30 pgs
Ch 2	Extract, Meissner Instruction Manual, undated	3:2.1 +11 pgs

Part	Chapter	Topic	minor topic	Page Number
	Ch 3	Technical Shorts,	Inductor Lore	3.3.1 +14 pgs
	Ch 4	Cover and spine inserts for binder		3.4.1 - 4.5
				Total <b>565 pages</b> <b>214 mB</b>

**Dynamic Navigation:** The custom dynamic navigation scheme specifically created for this e-book is intended to make the e-book "feel" to the reader a bit more like an old-fashioned book with two covers and lots of paper pages in between. You can click on any blue line in this Table of Contents in order to move to that particular portion of the book. This is true for both the lines in the table of contents, above, and in the bookmarks that will appear on the left of your screen once you open up the book. See "Author's Notes to the Reader" for details.

**Adobe Acrobat Reader:** Adobe Reader navigation functions can vary substantially from one Reader issue to another. Your review of the Adobe instructions applicable to your particular Reader version will be helpful in your choice of which commands to employ. Nothing in the dynamic navigation system changes or inhibits any Reader function.

**Pagination:** All pages are numbered, primarily for the use of those who have printed the e-book, in whole or part, to a paper format. Page identification is shown at the bottom of each page in the format "Part:Chapter.Page Number" as shown. For example, a page identified as 1:6.6 is the 6th page in Chapter 6 of Part 1; the Table of Contents tells you the major topic "*Circuit Instability*" starts there. Similarly, a page identified as 3:1.1 is the 1st page of a 4-page sequence in the Part 3 (General References) Chapter 1 extract of 28 pages taken from the ARRL Handbook, identified as such by the Table of Contents. When you access that 1st page, you will find a listing of keywords and Handbook page divisions to assist you in searching the 28-page Handbook extract.

The pagination scheme was chosen to allow additional pages be added to the book without disturbing existing pagination.

**A complete Table of Contents is available from [w6hht@arrl.net](mailto:w6hht@arrl.net)**
